EXPERIENCE

Apple

AI Resident

Jul 2021 – Present

Aachen, Germany

- Member of the Machine Translation team, responsible for the new Translate app on iOS 14.

Max Planck Society (MPI-IS & MPI-INF)

Machine Learning Researcher

Oct 2019 – Mar 2021

Tübingen, Germany

- Developed multiple methods for Explainability-aided Domain Generalization for Image Classification that led to state-of-the-art advancements on various generalization datasets.
- Research on Stochastic Non-Convex Optimization that enabled the optimization benchmarking suite “DeepOBS” via open-sourced baselines of 50,000 individual training runs.
- Advanced development of “DeepOBS” by fixing and developing key features that included batch comparison scripts, analysis code, and multiple framework endpoints.
- ➡ Publications featured twice in Andrew Ng’s machine learning newsletter “The Batch”.

IBM

Software Engineer Intern (Backend)

Aug 2019 – Nov 2019

Böblingen, Germany

- Managed intern team and conceptualized more effective instance-level master data graph representations that opened up new use-case sectors for Internet of Things requirements.
- Developed a prototype with React.js, a Python RESTful API, and Cassandra & JanusGraph databases which allowed users to connect and visualize sensor data in real-time.
- ➡ Presented the results to the team’s global head and wrote requested summary detailing value proposition and implementation details for senior leadership and offering management.

Eisenmann SE

Software Engineer (Backend)

Oct 2015 – Oct 2018

Böblingen, Germany

- Improved the configurable data analysis pipeline for the Manufacturing Execution System “E-MES” by implementing better reporting-frameworks for convenient customer usage.
- Implemented better KPIs for improved performance insights of many customers by collecting customer requirements and providing reporting solutions via JasperReports.
- Conceptualized an uncertainty-based single product tracking system for a press-hardening production line with limited sensor data.
- ➡ Took the initiative to solve under-specified sensor data collection problems on-premise in the USA, which was essential for the team to successfully complete the project on-time.
